

PRESS RELEASE

Agraferm Technologies AG completes its board of directors

Dr. Christian Hofmann appointed new Chairman of the Board

Pfaffenhofen, 25th January 2012. As of the 1st February 2012 Dr. Christian Hofmann will be the new Chairman of the Board of Agraferm Technologies AG. Dr. Hofmann (42) will take over responsibility for sales and marketing, which has temporarily been in the hands of the finance director Mr. Jörg Bornemann since March 2011.

Dr. Hofmann is a doctor of Agricultural Sciences and specialises in energy and process technology. He has held various executive positions in the energy and biogas business. For example managing director of Schaumann BioEnergy GmbH, which specialises in the production of energy from biomass and operates worldwide in the area of waste utilisation.

Dr. Hofmann has international experience and was an independent consultant for the biogas industry for many years. With his biomass expertise and his knowledge of the industry Dr. Hofmann is perfectly equipped to lead the company to reach its national and international goals. "We are delighted to have secured Dr. Christian Hofmann as Chairman of the Board, with his excellent reputation in the business. His appointment represents the continuation of the successful expansion strategy of our company in the national and international markets", said Dr. Max Hirschberger, Chairman of the Supervisory Board of Agraferm Technologies AG.

With this appointment Agraferm Technologies, one of the market leaders in the planning and construction of AD plants, has now completed its board of directors. Dr. Christian Hofmann will lead the company with Jörg Bornemann, Finance Director, who made a great contribution to the success of the company in 2011, and Heinrich Schulze Herking, who has recently been appointed Technical Director.

About Agraferm Technologies AG:

Agraferm Technologies AG, with its headquarters in Pfaffenhofen, Germany plans and builds AD plants for national and international markets. It is one of the few full-service providers for agricultural and industrial AD plants. Its service catalogue covers the full spectrum of services for the biogas industry: from the planning, project management and building of plants to the technical and biological service and maintenance. Apart from Germany, the company operates in countries such as England, Italy, Luxemburg, Poland and the Czech Republic. Agraferm Technologies AG is the management company of the Agraferm Group, with its affiliates BTA International GmbH, Agraferm Italia Srl, Agraferm Technologies Luxembourg s.à.r.l. and Agracontrol s.à.r.l. Together they cover the complete value chain of the building and service of AD plants.
